

Windows driver path

- ✓ **Standard IPP printer** — anything that prints, prints to the VPs
- ✓ Your media sizes in **every program's paper list**
- ✓ Placement popup: drag bands, auto-place, zoom, nudge, exact mount-edge readouts in the margin
- ✓ True per-pen band heights and seam lines from printer calibration
- ✓ One placement per job; page browsing on multi-page jobs
- ✓ Remembered placements; popup works with the printer off
- ✓ Copies pre-filled from the app; store-once print-many
- ✓ Streaming decode for huge jobs; accurate queue progress
- ✓ Auto-print countdown; belt-speed readout with honest "(last)" marker
- ✓ Clean instant cancel — from the popup or the Windows queue
- ✓ Open in Studio — artwork and placement hand-off

Home & jobs

- ✓ **Home tab**: recent jobs + your job folders, live piece previews
- ✓ Card click opens; right-click Details shows data, dates, last printed
- ✓ Pin unlimited folders; default jobs folder for every save
- ✓ Pick your startup page + open-last-job — launch, **Space, Space** reprints yesterday's job

Design

- ✓ Rulers in/mm, grid + snap, multi-select, align, step & repeat, 100-level undo
- ✓ **Smart alignment guides** — snap to objects, page, and pen bands while dragging
- ✓ Any installed font; per-line styles; rotation, mirror, outline, spacing
- ✓ Skip-blank-line address blocks; linked objects; conditional printing
- ✓ Tokens: fields, counters, date/time incl. julian, shift codes, operator prompts
- ✓ Images per-record via «FIELD»; line-art vs photo modes
- ✓ Content-aware dithering — crisp text, smooth photos
- ✓ Purge bars on the canvas; non-printing reference layers
- ✓ **Keyboard everywhere**: single-letter tool keys, page jumps, zoom — every shortcut remappable

Barcodes (39 symbologies)

- ✓ USPS IMB (live validation), POSTNET, PLANET
- ✓ QR, Micro QR, DataMatrix (GS1/FNC1), Aztec, PDF417
- ✓ Code 128/39/93, I2of5, EAN/UPC, GS1-128, Codabar, MSI...
- ✓ Royal Mail, Australia Post, KIX, Japan Post
- ✓ Shave/BWR, module width (mils), bearer bars, HRT, quiet-zone warnings

Pen care

- ✓ Purge bars: start-of-run modes, repeat every N pieces, patterns
- ✓ Smart purging — only idle nozzle rows
- ✓ Random keep-alive jetting on both print paths, previewed honestly

Data

- ✓ CSV/TSV, Excel .xlsx, dBase .dbf, Access .mdb/.accdb, XML, multi-page PDF — the picker offers only what loads
- ✓ XML records and fields found automatically — nested elements and attributes become fields, nothing to map
- ✓ Filter defines the print set; search; stable sort
- ✓ **Data side pane**: field usage badges, live samples, double-click insert
- ✓ Data-quality checks: blanks in used fields, duplicates, digit drift — one-click show
- ✓ Reload the same file in place after a corrected list arrives

Media sizes

- ✓ **One machine-wide list** — Studio, tray, installer, and every program's paper list
- ✓ Trade catalog: ~55 envelopes, postcards, seed packets, stakes, labels
- ✓ Tick to add, untick to remove — one manager dialog everywhere
- ✓ Long side = feed direction, matched to how pieces run

Production

- ✓ **Printer-confirmed** green flags, straight from board counters
- ✓ Ranges: unprinted / all / span / selected / reprint-flagged; per-record copies
- ✓ Live next-up tracking; run summary (pieces, time, rate, cost)
- ✓ Ink cost estimator + actual metered cost; self-calibrating
- ✓ Batch separation: blank pieces or relay pulse at every break
- ✓ Relay output events with delays in ms / inches / pieces
- ✓ Layout checker: overflow, bad tokens, missing images, blanks
- ✓ Instant honest abort — the machine plays its normal stop, no halt to clear; plain-language error dialogs
- ✓ **Pause feeding anytime** — the run waits for media, never aborts
- ✓ **Machine control on the Print page** (VP Link): live per-channel state, speeds, feeder mode, halt/clear — a clamp or alarm is never hidden
- ✓ **Run automation** — start/stop the machine with the job: ordered ON/OFF sequences with per-step delays; the off sequence is the run-out; start when Print is pressed or when the printer is ready; pause/resume keeps one job, one summary
- ✓ Drive faults stop and name themselves; **warnings report without stopping**; date-stamped machine history in-app
- ✓ Space-bar print with an are-you-sure (Space again confirms)
- ✓ Production history + lifetime piece counter (survive reinstall)

Tags, cards & QR codes

- ✓ **Scan a cartridge** — its ink profile is set printer-wide in one motion, from the machine's reader, a PC scanner or a keyboard-wedge scanner
- ✓ **Job cards** open a job; **run cards** open it and start printing behind a countdown you can cancel
- ✓ **Pre-written card packs** — tap a new card, pick its job, done; nothing to write. The **Tags & QR Codes** tool writes NFC cards or prints QR labels
- ✓ Scan a supply on the order form to add it; **kiosk mode** — “tap a card to start” — for the shop floor

Settings & configuration

- ✓ One professional Settings window, eleven pages: General, Your details, Printing, Machine, Ink & Costs, Media Sizes, Shortcuts, Integrations, Scanner, Updates, License
- ✓ Units in/mm; jobs folder; startup page choice
- ✓ **Remappable shortcuts** — double-click, press the new key; travels in the machine config
- ✓ Print buffer depth; batch-break machine defaults
- ✓ **Machine-config export/import** — one .vpconfig file: sizes, profiles, jetting, placements, settings, optionally the jobs themselves
- ✓ Selective restore with automatic .bak of anything replaced

Head alignment

- ✓ **Print the target, scan it on any flatbed** — stitch seams, pen offsets, photocell distance and encoder measured in one pass
- ✓ Every value reads OK / wait / FIX against its margin; proposals come from the history of scans and each change is verified by the next
- ✓ Apply to head with an automatic backup and one-click restore; check print and alignment certificate
- ✓ Purge from the bench; every print and scan logged with its full report

Licensing & updates

- ✓ Editions: FULL (driver + Studio) or driver-only; trial keys
- ✓ Hardware-bound keys entered in seconds; survive reinstalls
- ✓ **Add-on keys** — optional modules beside the edition key (Stamps.com postage today)
- ✓ **Dealer code** brands the install — your dealer's logo, contact and ordering page in-app; verified live with TNR
- ✓ **Clock-tamper protected** — winding the PC's date back never extends a timed key
- ✓ Full-featured mock mode with no key — nothing hidden
- ✓ Daily update check with release notes — never installs by itself
- ✓ Checksum-verified downloads; one-click reinstall of the previous version

Installer

- ✓ One setup: service, printer, driver, tray, Studio, runtime
- ✓ **Digitally signed** — installer and every app carry a verified TNR Developments signature
- ✓ Printer wizard with live schematic — or reads the printer's own configuration
- ✓ Media-size selection from the trade catalog; re-runs keep your list
- ✓ Licensing page: status, Machine ID, key entry, key request
- ✓ Version-aware maintenance: Reinstall / Update to X / Go back to X

Mock mode

- ✓ Full pipeline with no printer — trigger window is the photo-eye
- ✓ Auto-trigger simulates the belt; relay LEDs; event log
- ✓ Real buffering, queue progress, cost metering — free on every install

Tray companion

- ✓ Live status menu; ink profiles (voltage / pulse / warming) with Apply to Printer
- ✓ Job bundles — the active Job drives Word prints
- ✓ Spit purge, relay pulse tests, bench software trigger
- ✓ Jetting settings, production history, config export

Postage (Stamps.com add-on)

- ✓ Postage tab: live balance, buy postage, verified return address
- ✓ What a piece costs — class + ZIP, live rate
- ✓ Unused postage claimed back automatically per your refund policy
- ✓ Account tasks open stamps.com already signed in — no passwords mid-shift

Dealer page

- ✓ Who supports this machine — logo, phone, email, website, one click
- ✓ One-click supply reorders; license requests routed to your dealer
- ✓ Diagnostics window: live machine state + the full drive fault list

Help

- ✓ **Built-in help**: F1 anywhere opens the topic for the screen you're on
- ✓ Instant offline search; real screenshots; works with no internet

Suite

- ✓ One service serves both print paths — jobs never fight over the hardware
- ✓ **Releases the printer when idle** — XiJet's own utilities work alongside
- ✓ Pen layout read from the board's own calibration — split print zones, one or two headboards, detected automatically
- ✓ Unified visual language across Studio, popup, tray, and installer
- ✓ Live diagnostics page + rolling logs; dot-exact print dumps
- ✓ High-DPI clean at 100–300% scaling
